

The software and USB interface cable enable convenient parameterization of infrared pyrometers of series OKS

Technical Data

Type	DAK 317
Art.-No	6913I
Operating system	Windows
Language	German / English
Interface cable	OKS / USB
Cable length	1,8 m

The software allows by connection of a pyrometer through the USB interface cable to display and adjust the following parameters on the PC or laptop:

- Temperature display °C / °F
- Measuring range settings
- Emissivity
- Maximum value memory
- Response time t95

The software runs under Windows. The temperature display can be shown as °C or °F. The user interface system is multi-lingual and entirely intuitive. The software offers beside the possibility of the parameterization also the recording and evaluation of the measuring data.

Stand-alone operation:

If the OKS series device is connected via USB to a PC no further power supply is required for operation of the device.
